ISO 45001:2018
INTERNAL AUDITOR AND IMPLEMENTOR COURSE

Understand Safety Management System

Course Overview:

ISO 45001:2018 is the internationally recognised standard for occupational health and safety management systems. It provides a systematic way to identify hazards and control risks while maintaining assurance that these risk controls are effective.

Participants will learn to interpret each clause of standard, the compliance requirements, and conduct an internal audit in their organisation.

Key topics:

- What is ISO 45001:2018
- Review of ISO 45001 requirements
- Hazard identification, risk assessment and determining controls
- Compliance to legal requirements
- Competence, training and awareness
- Communication, participation and consultation
- Documentation
- Operational control
- Emergency preparedness response
- Performance measurement and monitoring
- Incident investigation, non-conformity, corrective and preventive action
- Methodology for carrying out an audit (Conducting documentation review, inspections and interviews)
- Report audit findings
- Practical exercises

Who should attend:

Safety managers, WSH officer, Safety coordinator, Management representatives, Internal auditors of organisations implementing or auditing the ISO 45001:2018
